

# FOUR REASONS TO MOVE FROM EXCEL TO **WORKDAY ADAPTIVE PLANNING** ...NOW

## 01 **Easy collaboration with multiple business units**

(including Sales, Marketing, and HR) simplifies forecasting and scenario planning resulting in the removal of silos that naturally happen when multiple spreadsheets are being used.

## 02 **Streamlined ERP and CRM integrations**

ensure smooth data flow and consistency, bolstering data integrity, providing a comprehensive overview of the company, and expediting reporting.

## 03 **Reduction in human errors when entering data**

It's estimated that nearly 90% of spreadsheets contain errors, and half of spreadsheet models used in large businesses have major negative impacts to the business.

## 04 **Built specifically for financial planning**

Workday Adaptive Planning was founded in 2003 by a long-standing CFO who believed that there had to be a better way to approach financial planning and reporting.

“Sometimes it would take me up to an entire day just to roll the model forward and update every tab that needed to be updated every time we closed a new month of actuals.”
